Building Agentic AI Systems for Developers

6h 55m · 6 items · Intermediate · Updated March 2025

+1

4 Instructors

1,944 learners

These hands-on courses equip developers and engineers with the technical skills to design, build, and deploy autonomous AI agents using frameworks to automate complex workflows and create intelligent, decision-making systems. Developers will work with multiple frameworks including AutoGen, LlamaIndex, and LangGraph while building real-world applications such as advanced chatbots and task automation systems.

Congrats, Learning Path completed on September 16, 2025!

What you'll learn

[Home](#)[Learn](#)[My Library](#)[Content](#)[Apply](#)[Coding Practice](#)[Certifications](#)[Trending topics](#)[Leadership and Management](#)[Artificial Intelligence](#)[Cybersecurity](#)

- ✓ **Learn** implementation patterns and responsible AI principles.
- ✓ **Evaluate** and experiment with emerging agentic technologies.
- ✓ **Implement** multiagent AI systems using the AutoGen framework.
- ✓ **Build** and deploy autonomous AI agents with LlamaIndex.
